BENCH GRINDER 250W WET/DRY - POWE80085

This bench grinder is developed for sharpening tools with cutting edges such as knives, shears, chisels, etc. It can also be used for smoothing thin metal sheets. It comes with a fast running dry grinding wheel (Ø150mm) and a slow running wet grinding disc (Ø200mm). A large spark guard and eye shield provide an optimal eye protection. The adjustable work support table ensures a better control and offers a maximum comfort.

The low-noise 250W induction motor, with up to 2950 rotations per minute, gives you the power for grinding, sharpening and deburring of steel and metals, garden, kitchen and hand tools. The rubber feet reduce vibration and the ball bearing rotor shaft guarantees a long service life of the machine.
