

MEDIA MOUNT

Product data sheet; structure of screen - Media Mount Cinema Screen

Structure of screen

- Photosensitive material layer
- Transparent layer
- Base layer
- PVC

Declaration of Stratification Structure

1: Photosensitive material layer: Best white diffusion material. Not absorbing light itself, but reflecting the light rays received uniformly.

2: Transparent layer

3: Base layer: FYD superstrong-fabric layer

4: After fabric layer: black PVC film laminate

Image performance: True and accurate reduction performance of colors, smooth image, wide angle range of visibility, uniform brightness and no bright spots; uniform proliferation.

Performance of fabric surface: smooth fabric surface, no smell, crease-resistance, flame retardation and cleanable.

Performance parameter: Gain: 1,0; Visual angle 2a: 100"; Thickness of fabric surface: 0,045mm
